

Beginning this week (7/19/2021), the contractor will begin preparation work prior to the asphalt overlay that will be placed along Cadillac Drive. You may expect the following sequence of activities as this work progresses:

- Curb and Gutter Spot Repair/ Concrete Patching/Sanitary Sewer Repair
There are three significant patching locations along Cadillac Drive that will result in a closed roadway from 3008 to 3032 Cadillac Drive. On the back is a map of the closure area. In order for the contractor to begin these sanitary sewer repairs, this section of road will be closed for **approximately two (2) weeks**. If you live at any of the following addresses: 3008, 3020, 3026, or 3032 Cadillac Drive, a label has been included in your letter that may be placed on your trash can and placed outside of the construction area on your regular trash collection day.
- Taper Milling
The asphalt overlay will add some thickness to the current pavement. To blend this height back into the adjacent intersections, a taper mill will take place. **The contractor will grind the ends of the restoration area in advance of the base pavement.** The roadway will remain open to vehicular traffic during this step.
- Base Pavement (Asphalt)
The base will be placed in one day and may be driven on soon thereafter. During this placement, no access will be allowed on the street or to driveways. The contractor will post "No Parking" signs along the street prior to the start of construction. Once these are posted please be sure to relocate your vehicles out of your driveway if impacted.
- Surface Pavement (Asphalt)
Surface paving will take place in one day and may be driven on soon thereafter. During this placement, no access will be allowed on the street or to driveways.
- Seeding
Following the construction of the street, the contractor will begin restoring the grass along the curb-line and driveways where disturbed from curb and gutter replacement. Depending on the time of year and weather conditions, this process may take up to an additional three to four weeks.

Weather permitting; this construction process will take approximately **two (2) weeks after the taper milling will take place** with additional time for seeding. During most of that time frame, the roadway will be fully open to vehicular traffic.

If you want additional information about the 2021 Street Construction Project, please visit the project web page at www.cedarfalls.com/StreetConstruction. To receive road closure notices by email, visit <http://www.cedarfalls.com/notify> and follow the instructions for road construction as shown. If you have any questions or concerns during the course of construction, you may contact Ben Claypool by phone: 319-268-5161, fax: 319-268-5197, or email: Benjamin.Claypool@cedarfalls.com.
